journal of statistical planning and inference

CONTENTS

A note on directed adjusted profile likelihoods
N. Sartori, A. Salvan and L. Pace 1

On selection procedures for positive exponential family distributions based on type-I censored data
S.S. Gupta, S. He and J. Li 11

An efficient algorithm for estimating the parameters of superimposed exponential signals
Z.D. Bai, C.R. Rao, M. Chow and D. Kundu 23

Reference priors for exponential families
E. Gutiérrez-Peña and R. Rueda 35

GMM tests for the Katz family of distributions
Y. Fang 55

Nonparametric tests for the mean of a non-negative population
W. Wang and L.H. Zhao 75

Projection bounds on expectations of record statistics from restricted families
L. Gajek and A. Okolewski 97

On multivariate quantile regression
B. Chakraborty 109

Iterative weighted least-squares estimates in a heteroscedastic linear regression model
K. Inoue 133

D-optimal weighted paired comparison designs
E.E.M. van Berkum and B. Pauwels 147

The flower intersection problem for Kirkman triple systems
Y. Chang and G.L. Faro 159

Author Index Volume 110 179
